## **May - [Earth Harvest Lawn +](#)**

Complete nutrient tea, biostimulant and mycorrhizae

**June - ICT Organics liquid corn gluten - 8** Feeds lawn and boosts the prevention of crabgrass and other grassy weeds from seed.

## **July - Earth Harvest Lawn +**

Complete nutrient tea, biostimulant and mycorrhizae

## **August - ICT Organics liquid corn gluten - 8**

Feeds lawn and prevents annual bluegrass and broadleaf weeds from seed.

## **September - Earth Harvest Lawn +**

Complete nutrient tea, biostimulant and mycorrhizae

## **October - ICT Organics liquid corn gluten - 8**

Feeds lawn and prevents Fall / Winter weeds. ( chickweed , henbit , and bittercress )

## **November - Earth Harvest Lawn +**

Complete nutrient tea, biostimulant and mycorrhizae

NOTE : Liquid corn gluten meal prevents broadleaf and grass type weeds better than dry corn gluten meal.

Optional treatments: Water the lawn as needed.

1. **ICT Organics ESSENTIAL - 1 - Insecticide concentrate.** This is an organic insecticide for surface insect control. ( ants , fleas , ticks , and mosquitoes ) use as needed.
2. **ICT Organics NPP : Organic Fungicide :** Can be used to control brown patch, leaf spot , red thread , rust , and fusarium, and many other lawn diseases.

This lawn program gives you the first year up to 70% weed control and density. Second year up to 80% weed control and density. There after 90+ weed control and density.

When seeding in the fall, Sow WaterSaver RTF grass seed 4 weeks after the August Gluten - 8 application. Replace the October Gluten - 8 application with an application of Earth Harvests Lawn + .
