Trees

Prune and remove vines, english ivy, poison ivy, and wild grapes from tree trunks now.

Vegetables

Gardeners that had no luck with root crops like turnips , beets, or potatoes and that grew large tomato plants that produced few tomatoes, those gardeners DO NOT ADD any more organic soil conditioners to their gardens. The soil already contains to much nitrogen. You will only check the ph with a [ph tester](#). And adjust the PH as needed.

These gardeners will not use any fertilizer when planting new crops in the spring.

Vegetable gardens will be sown with winter grain rye after the beds have been cleaned, the rye will be used as a cover crop.

Plants

Banana plants that have been damaged by night frost can be cut back then dug up and potted so that they can be taken indoors for the winter. Keep the banana plants soil on the dry side while indoors and feed with [seamate](#) when watering once a month.

If you have Musa Banana plants it is safe to keep them planted out side in zone 6 and up. Mulch them with 4 inches of hardwood mulch. And they will come back next spring if they are planted in full sun.

Frozen foliage from, Caladium, Canna lilies, Elephant ear, Dahlias, and Tuberose should be cut away and tubers will be dug up and air dried. Store the Caladium and Elephant ear tubers in a warm dry indoor place. Dahlia , Tuberose, and Canna lilies are stored in a much cooler but frost free place (40-50 degrees).

Cover the tubers with dry sphagnum peat moss or vermiculite.

Lawn

Keep removing the falling leaves from your lawn.

In northern states make the last cut on your blue grass lawn at 2 inches and for tall fescue cut to 2.5 inches this will help prevent "snow mold".

If your lawn was damaged last year by snow mold buy [Bonide infuse](#) now, so that you will have it on hand, to be applied in December to prevent any snow mold this season.

- Continue removing falling leaves from the lawn.
- It is not too late to seed tall fescue seed if possible cover the seed when seeding.

Indoor Plants

Gardenia , Jasmine , and potted citrus plants. Make sure to add 2 tablespoons of vinegar in a quart of water and water them. Do this once a month. And feed with seamate with every watering.

Insects

Control ants, fleas, ticks, and stink bugs indoors with [summit Permicide P-1 \(Called bed bug killer\)](#)

- Boxelder bugs, pill bugs, stinkbugs, and crickets that are trying to enter your home can be controlled by using [Bonide eight](#) or Summit mosquito and gnat barrier spray. Spray a 4-6' barrier around your home and garage.

- Concrete, pool surroundings, patios, natural stone, roofs, siding, tennis courts, and outside stored marine craft can be treated with [Wet and Forget](#) to remove moss, mold, mildew, and algae stains. You can also use *Wet and Forget* to prevent the moss, mold, mildew, and algae from forming.

Flowers

Continue planting Tulips and Daffodils and other minor spring bulbs, after annual flowers have frozen. If you have no garden space plant a few paper white narcissus. Use 3-5 bulbs per pot. Keep the newly potted paper whites cool (35-45 degrees) for 3-4 days. After the cooling, place them in a warm and well lit place indoors, your paper whites will bloom within 14 days with a good root system.

To keep mice out of your garage, shed, Rv, or basement use Bonide [mouse magic](#) as a repellent.
