#### Shrubs:

Check the Ph on evergreens and shrubs that like a high Ph ( Arborvitae, Yew, Boxwood, Lilac, Privet, Ligustrum, and Peony ) use [an electronic Ph tester](#) to test the ph. If the Ph needs to be increased, use [Bonide Hydrated Lime](#).

Remember that Fall is the best time for planting. Visit your garden center. There is a good selection of plants and they are priced to move. When planting these new plants water them in with [Kick Start](#) to help establish a quick root system. Don't forget to feed you deciduous trees and shrubs with [Plant Trust](#) now.

#### Perennials:

If your perennials are over crowded now is the time to divide them after cutting them back for the season. Extra plants can be given away or planted in a new bed. After transplanting them be sure to use [Gallery broadleaf weed preventer](#), before you mulch the area with Sweet Peet to prevent weeds ( Chickweed , Henbit, and Shepard Spurge ) And always remember to feed your perennials now with [Garden Trust](#). Delphinium and Foxglove seed stalks can be cut into smaller pieces and can be spread onto a new growing area ( Cover them lightly with compost). Next spring this should produce many new Delphinium and Foxglove plants.

#### Flowers:

Make sure you have Tulips, Daffodils , and Crocus handy after the first frost, it will be time to replace the summer flowers with these bulbs. If you want instant color you can plant Violas / Pansies over top of the newly planted Dutch flower bulbs, but make sure the bulbs are planted deep enough (3-5 inches) After planting the Violas / Pansies apply [Garden Trust](#), It will last long enough to feed the plants from fall and throughout Spring. Plant Fritillaria bulbs to repel moles and mice in your bulb beds. Be sure to use [Bonide Mouse magic](#) now to keep mice out of your garage , camper, boat, and sheds. A note for landscape contractors, There is a shortage of Darwin Hybrid tulips. If you have not purchased them by now you may not be able to find them in large quantities they may only be available in small amounts in retail stores.

#### Lawns:

Lawns that have not been fed with [Turf Trust](#), feed as soon as possible. Grass that has not been fed will have a higher chance of being overtaken by weeds. Do not use any starter or winterizers with high Phosphate numbers ( middle number) Young grass that was planted this fall and has been mowed at least twice can be sprayed with [Speedzone](#) to kill any broadleaf weeds that are growing in them (spray when day temps are 55 or above for three days). To prevent there return you can apply [Gallery](#) at the same time. Leaves continue to drop onto the lawns, keep up with them and remove them as needed by blowing or raking them use a [leaf loader](#) for easy leaf removal. Apply [Kick Start](#) now to newly seeded lawns.

Lawns that are in warmer states should still be mowed as needed.

#### House Plants:

House plants that are susceptible to mites (Ivy, Prayer Plant, Croton , and Schefflera ) Treat them with [Summit year-round spray oil for houseplants now](#), before they show signs of an infestation.

Poinsettias :

Look for Poinsettia plants at your local garden centers. Choose plants that are being kept in a green house at proper temperature. Do not buy Poinsettias that are in sleeves, They will drop leaves soon. Keep you Poinsettias in a bright place out of drafty areas like vents. Keep them slightly moist and when you water them feed them with seamate.

Stone Patios , Decks, Roofs, and Siding not treated with [Wet & Forget](#), do it now to remove mold, mildew, Lichen , and moss. Winter weather will assist with the cleaning of those areas.

Monarch Butterflies:

Due to the declining populations of Monarch Butterflies you can now help them by planting milk weed plants and or seeds. For milkweed plugs go to [Monarchwatch.org](http://Monarchwatch.org). Seeds are also available for homeowners that would like to have small projects to help Monarchs. Common milkweed and swamp milkweed can be grown in most U. S states. Showy milkweed can be grown in the Western states and central states. whorled milkweed is not recommended for people that have pets.
